

## CPA Members – Supply Status

[as of 17 April 2020]

The CPA, working in partnership with the Builders Merchants Federation, is surveying our respective members to determine their operational status in response to the Covid-19 virus. Shown below is a summary for the CPA’s largest Members. The BMF has posted similar updates of its merchants and suppliers that can be found on its [website](#).

These surveys should highlight how the supply of construction products and materials to merchants and builders may be impacted by reductions or closures in production, distribution, and stocks.
